v2.1: Edited, anonymous dataset for public distribution

## Overview

### ABSTRACT

The District Level Household and Facility Survey (DLHS-3) is a nationwide survey covering 601 districts from 34 states and union territories of India. This is the third round of the district level household survey which was conducted during December 2007 to December 2008. The survey was funded by the Union Ministry of Health and Family Welfare, United Nations Population Fund (UNFPA) and United Nations Children's Fund (UNICEF).

DLHS-3 also collected information regarding facilities available at the Sub-Centre, Primary Health Centre (PHC), Community Health Centre (CHC) and District Hospital. The main objectives of the health facility survey are to assess the facilities having critical inputs as per the norms, and to know the extent of utilization of facilities at various levels. The health facility survey has been conducted as a companion survey of the household survey in DLHS-3. There were separate questionnaires for each category of health facility, including questions on infrastructure, human resources, supply of drugs and instruments, and performance.

### UNITS OF ANALYSIS

District hospitals in India

### KEYWORDS

health facility, district hospital

## Coverage

### GEOGRAPHIC COVERAGE

National coverage

## Producers and Sponsors

### PRIMARY INVESTIGATOR(S)

Name	Affiliation
