Overview

ABSTRACT

The National Family Health Survey (NFHS) is a large-scale, multi-round survey conducted in a representative sample of households throughout India. The NFHS is a collaborative project of the International Institute for Population Sciences(IIPS), Mumbai, India; ORC Macro, Calverton, Maryland, USA and the East-West Center, Honolulu, Hawaii, USA. The Ministry of Health and Family Welfare (MOHFW), Government of India, designated IIPS as the nodal agency, responsible for providing coordination and technical guidance for the NFHS. NFHS was funded by the United States Agency for International Development (USAID) with supplementary support from United Nations Children's Fund (UNICEF). IIPS collaborated with a number of Field Organizations (FO) for survey implementation. Each FO was responsible for conducting survey activities in one or more states covered by the NFHS. Technical assistance for the NFHS was provided by ORC Macro and the East-West Center.

The First National Family Health Survey (NFHS-1) was conducted in 1992-93. The survey collected extensive information on population, health, and nutrition, with an emphasis on women and young children. Eighteen Population Research Centres (PRCs), located in universities and institutes of national repute, assisted IIPS in all stages of conducting NFHS-1. All the state-level and national-level reports for the survey have already been published (48 reports in all).

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Interviews were conducted with a nationally representative sample of 88,562 households and 89,777 ever-married women in the age group 13-49.

Coverage

GEOGRAPHIC COVERAGE

Interviews were conducted with a nationally representative sample of 88,562 households and 89,777 ever-married women in the age group 13-49, from 24 states and the then National Capital Territory of Delhi (which later attained statehood), India.

DDI DOCUMENT VERSION

Version 1.0. This is the very first version of this DDI document.

DDI DOCUMENT ID

ind-cgchr-nfhs1-1992-1993-v1

Sampling

Sampling Procedure

A uniform sample design was adopted in all NFHS states, which is a systematic, stratified sample of households with two stages in rural areas and three stages in urban areas. A detailed overview of the sample stages can be found here <http://rchiips.org/nfhs/data/india1/iachap2.pdf>.

Weighting

At the national level, the overall sample weight for each household or woman is the product of the design weight for each state (after adjustment for non-response) and the state weight.

Questionnaires

Overview

Household Questionnaire

Woman's Questionnaire

Village Questionnaire

Data Collection

Data Collection Dates

Start	End	Cycle
